

What would change our minds?

A disciplined checklist for testing a thesis and identifying where the evidence falls short.

SAMPLE EDUCATIONAL MATERIAL - NOT A PUBLISHED CLUB REPORT

Write the counterargument

State the strongest reasonable case against the thesis.

Separate facts and forecasts

Label observed results, estimates, and assumptions. Cite the source and date for every material fact.

Define review triggers

Identify changes in demand, margins, leverage, or competition that require a new review.

Paper research only

The Short category demonstrates the library filter. It does not represent an executed short position.

Educational framework. Virtual capital. Not investment advice.
